

MEMORANDUM

To: Mr. Bolden

From: Tao Zhang

Subject: Programming Assignment 5

Date: April 11, 2014

This memo shows the process and results of programming assignment 5.

The output shows that everything works well.

Based on the experience of working on assignment 4, it is not hard to have the methods of drawing these stuff. I wrote a single .c file for each requirement, with name, class information string draw on some fixed position. Except 2D function, I have the keyboard animation to rotate, scale, and fill/unfill polygon methods in each file.
